

BILLET MODULAR FLUID MANAGEMENT

Granatelli
MOTOR SPORTS

www.granatellimotorsports.com

INTRODUCES THE LATEST ADDITION TO THE 2011 GRANATELLI SIGNATURE SERIES BILLET MODULAR FLUID MANAGEMENT SYSTEM

The GMS Billet Modular Fluid Management system provides a simple yet effective management system for your vehicle fluids. With containment devices for PCV oil, radiator coolant & power steer fluid currently available, you can now contain your fluids to a volume of your choice. With our completely modular system, sections can be combined to create a containment system to suit your vehicles needs. With all components CNC machined from high quality billet aluminium, it also looks great.

STANDARD FEATURES

Fully CNC machined for ultimate strength and appearance

Internally filtered and directionally baffled to improve oil/air separation process where required (replacement filters available)

Comes complete & ready to fit with single bolt straight bracket, hose barbs, and stainless mounting hardware

Available polished or black anodized

OPTIONAL FEATURES

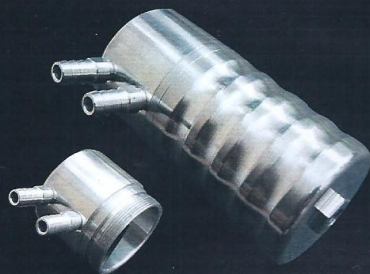

A range of mounting brackets are available to suit most needs (sold separately), giving you the choice to mount up to 3 devices on a single bracket. Also available are 90deg angle mount left and right hand brackets & two bolt brackets for the most demanding operational conditions.

A range of -6AN and -8AN screw in fittings are available

Volume expansion kits (approx. 12 ounces) are available, complete with seals & spacer ring. This allows you to add sections to each device, therefore increasing the volume by up to 5 times when used with suitable additional brackets (sold separately).

Plumb back systems & dual inlet options available for PCV catch cans to suit most applications.

available polished or black anodized

700100

PCV SINGLE INLET CATCH CAN

Includes catch can, straight single bracket, required barbed fittings, seals & stainless hardware

700101

PCV TWIN INLET CATCH CAN

Includes catch can, straight single bracket, required barbed fittings, seals & stainless hardware

700102

VOLUME EXPANSION KIT

Includes volume expansion tube, spacer ring & seals

700103

RADIATOR OVERFLOW TANK KIT

Includes overflow tank, straight single bracket barbed fittings, seals & stainless hardware

700104

POWER STEERING RESERVOIR TANK KIT

Includes reservoir, straight single bracket, required barbed fittings, seals & stainless hardware

700105

MOUNTING BRACKET

Includes single bolt straight / multi size mount kit

700109

MOUNTING BRACKET

Includes twin bolt straight / multi size mount kit - Holds Double Catch Can

700110

MOUNTING BRACKET

Includes twin bolt straight / multi size mount kit - Holds Triple Catch Cans

PRODUCT LINE IS ALSO AVAILABLE IN BLACK: ADD "-B" AFTER THE PART NUMBER

The GMS Billet Modular Fluid Management system will be available and in full production with the following part numbers (subject to change) by mid December 2010.
