GRANATELLI MOTOR SPORTS IGNITION WIRES

*Patented "Near ZERO" Ohm Technology.
- A revolutionary breakthrough in ignition performance & technology available **EXCLUSIVELY** from Granatelli Motor Sports.

*NO radio or electronic interference.

*Up to 400% MORE energy to the spark plugs.

*Average gain (5HP N/A & 12-15HP w/factory forced induction).

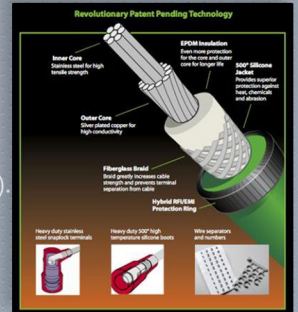

*Improve gas mileage and throttle response.

*Solid stainless connector cable & snap lock plug connectors.

*8MM 500° silicone jaclet with fiberglass-reinforced braid.

*500° silicone boots standard / 1200° boots optional.

*OBD-II computer safe, exceeds OEM specifications.

GRANATELLI MOTOR SPORTS FORD IGNITION COILS

*Direct OEM replacement, exceeds OEM specifications, OBD-II computer safe.

*Increase power to the spark plug up to 400% over stock.

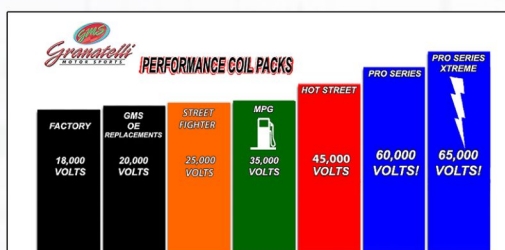

*Adds up to 15HP (normally aspirated) & 35HP (s/c, turbo, & nitrous).

*0 Ohm resistance, no RFI / EMI interference thanks to patented protector ring.

*Solid stainless connector cable with stainless snap lock spark plug connectors.

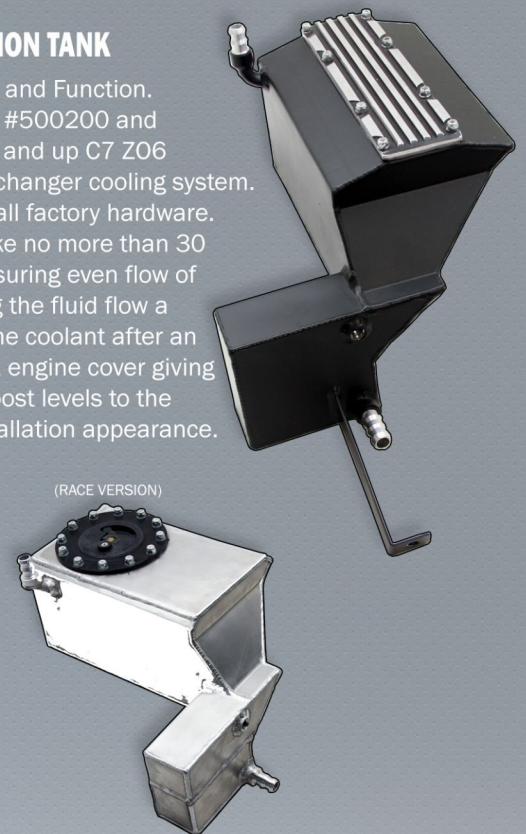

*Up to 65kv coils provide 40,000 more volts than factory coils, ideal for supercharged, turbo, & nitrous applications where spark blowout from weak factory coils is common.

*Improves mileage and throttle response.

GRANATELLI MOTOR SPORTS C7 Z06 CORVETTE INTERCOOLER EXPANSION TANK

Granatelli Motor Sports has once again set the pace for Corvette Z06 Fit, Form, and Function. Introducing the Granatelli Motor Sports HEAT EXCHANGER Expansion Tank (Part #500200 and #500200R). System is intended to be an easy direct fit installation for all 2015 and up C7 Z06 model Corvettes. This Unique Design adds 1.75 Gallons to the vehicle's heat exchanger cooling system. The Granatelli hand built 6061-T6 expansion tank is a simple installation using all factory hardware. With slight modification to one hose, the installation on a cool engine should take no more than 30 minutes. Additionally, the intercooler expansion tank has a built in spray bar, ensuring even flow of coolant and/or water across the entire tank and a windowed lid to make viewing the fluid flow a cinch. A built in petcock valve allows for easy emptying of the tank, to replace the coolant after an event. The Granatelli unique design mimics the same taper and angle of the OE engine cover giving it a true stylized look while increasing capacity. A must for anyone increasing boost levels to the engine or just doing spirited extended driving. Total OEM looking finish and installation appearance.

GM 3.6L V6 CAR / TRUCK COIL ON PLUG

GRANATELLI MOTOR SPORTS CHEVROLET IGNITION COILS

*Works with 2005-Present GM LS and LT series Cars and Trucks.

*Direct OEM replacement, exceeds OEM specifications, OBD-II computer safe.

*Increase power to the spark plug up to 400% over stock.

*Adds up to 12HP (normally aspirated) over stock. Average gain 6-8HP on an otherwise stock vehicle. Gains of up to 18HP have been experienced on heavily modified vehicles.

*Up to 85,000 volt coils (Malevolent Series) provide 40,000 more volts than factory coils, ideal for supercharged, turbo, and nitrous applications where spark blowout from weak factory coils is common.

*Improves mileage and throttle response.

GRANATELLI MOTOR SPORTS

2015 AND UP S550 MUSTANG RADIATOR EXPANSION TANK

The Granatelli Motor Sports S550 Mustang Coolant Surge Tanks (Part # 510100-P for Polished and #510100-B for Black Wrinkle) for all 2.3 EcoBoost, 3.7 V6, Mustang GT and Shelby GT350. This Unique Design Eliminates the unsightly bubble tank delivered from the factory. The Granatelli hand built 6061-t6 reservoir is a simple remove and replace installation using all factory hardware, you don't even lose a drop of original coolant. All factory hose connections as well as the radiator cap are a direct cross over making installation no more than 10 minutes. The eye sore now nicknamed the "grenade" by several on the internet won't win you any trophies in the engine compartment. The Granatelli unique design mimics the same taper and angle of the OE engine cover giving it a true stylized look while increasing capacity. Well-Suited with ALL Aftermarket Air Intake Systems. Show quality finished in either Powder Coated Black, Satin, or Mirror like Polished! Many People are Unaware, as delivered from Ford the factory surge tank can spew coolant on to the road surface making it unsafe for racing conditions. If competitive racing is in your future, Granatelli offers Part # 510101-P and #510101-B with Integrated NHRA and SCCA legal 1-pint Catch Can and Drain Petcock.

The Granatelli Motor Sports S550 Mustang Coolant Surge Tanks for all 2.3 EcoBoost, 3.7 V6, Mustang GT and Shelby GT350 are available wherever Granatelli Motor Sports products are sold.

GRANATELLI MOTOR SPORTS LS INTAKE MANIFOLD

The Granatelli Motor Sports are our Fabricated Aluminum Sheet Metal Intake Manifolds for Most LS Series engine applications. Made from .125" wall TIG welded T6061 aluminum, these manifolds are capable of supporting upwards of 25 psi. They offer over sized large inlets capable of supporting 102mm big bore throttle body openings while utilizing the stock LS bolt center line. That means even the stock drive by wire throttle body will bolt right up! Robust .438" thick machined flanges insure perfect sealing every time to the cylinder heads. Optional .750" diameter fuel rails are capable of supporting 1500+ horsepower motors. Available in Polished or Black finish, this product is the finishing touch to your LSX project motor.

- * 1/8" wall thickness T6061 aluminum walls
- * TIG Welded Construction Insures Long Lasting Performance and Reliability
- * 102MM Bore Opening to Accommodate Large After Market Throttle Bodies
- * 7/16" (.438") CNC Machines Flanges Bolt to Head Surface
- * 9" Overall Manifold Height
- * Optional 3/4" (.750") diameter Fuel Rails Available

GRANATELLI MOTOR SPORTS COBRA RECEIVER / WINCH TOWER

Granatelli Motor Sports is leading the way in innovation again with their new Cobra Receiver / Tower Winch. With one accessory the trailer hitch receiver, winch tower, and mounting platform are all combined into one unit. With the Cobra Receiver / Tower Winch you can winch your car, boat, or utility vehicle onto your trailer while your trailer is hitched to the tow vehicle. The winch tower and mounting platform is capable of accepting 500lb, 1,000lb, 2,000lb, 4,000lb, 6,000lb, and 8,000lb winch footprints. It is available with the raised winch tower and mounting platform as well as a unique 8" tilting tower design. The 3" winch tower and mounting platform offers the lowest profile design and allows for lowering of the tailgate with clearance of the winch. The hitch receivers are available in 1/4" (up to 2000lb rating) and 2" sizes. The patent pending Granatelli Motor Sports Cobra Receiver / Tower Winch is perfect for trucks, off road vehicles, UTV's and more!
